**Good tyres. Good deal.**

# SnoVanis 3

## The new Barum SnoVanis 3 Van: Promise of reliability and efficiency for demanding winter use

### High mileage

The new pattern is designed to keep more rubber in contact with the road so that wear occurs more slowly. That means more mileage and lower costs.

### Winter safety

The SnoVanis 3 is equipped with the newest winter compound technology for van tyres which leads to safe handling on ice, snow, and wet roads which are safety features that all drivers highly value.

### Low rolling resistance

This new tyre saves fuel on snowy urban streets as well as in the deep snow of the countryside thanks to the block and sipe layout of the pattern and the new lower resistance compound.
